Professional Summary

Software Engineering graduate specializing in Flutter development, with hands-on experience building cross-platform mobile applications for Android and iOS using Flutter and Dart. Skilled in REST API integration, state management, responsive UI development, debugging, and performance optimization. Experienced with BLoC, Provider, Clean Architecture, GoRouter, Firebase, and Git/GitHub

Professional Experience

Flutter Developer Intern

January 2026 – June 2026

Nikradix | Bangladesh

- Developed cross-platform mobile applications using Flutter and Dart for Android and iOS, following clean and maintainable coding practices.
- Integrated REST APIs and third-party libraries while implementing Provider and BLoC for structured state management.
- Converted Figma UI/UX designs into responsive Flutter interfaces and collaborated with backend developers and designers.
- Debugged application issues and optimized performance to improve responsiveness and user experience.

AI Data Trainer — Annotator

January 2025 – December 2025

Genmorphics AI Solution | Bangladesh

- Annotated and created accurate human-generated data for AI training projects following project guidelines.
- Reviewed and corrected annotations to ensure accuracy, consistency, quality, and data integrity.
- Completed tasks within deadlines, maintained confidentiality, and communicated with team members on requirements and corrections.

Technical Skills

Frameworks/Platforms: Flutter
Programming Languages: Dart, C/C++
State Management: BLoC, Provider
Backend & APIs: Firebase, Firebase Authentication, Cloud Firestore, REST API Integration
Architecture: MVC, MVVM, Clean Architecture
Version Control: Git, GitHub

Projects

SHOPIX – E-COMMERCE MOBILE APPLICATION | Nikradix | in development

- Implemented structured navigation, dependency injection, responsive UI, and multilingual localization.
- Developed a scalable e-commerce application using Flutter and Dart with Clean Architecture and BLoC/Cubit.

Technologies: Flutter, Dart, Clean Architecture, BLoC, GoRouter, ScreenUtil

NEWS APP | Github

- Developed a Flutter news application that fetches current headlines and allows users to explore articles by source, category, country, and language.
- Integrated NewsAPI using HTTP with repository and view-model architecture and implemented BLoC for state management.

Technologies: Flutter, Dart, NewsAPI, HTTP, MVVM, BLoC

FOOD DELIVERY MOBILE APPLICATION | Github

- Integrated Firebase authentication and state management to support a smooth user experience and scalable app structure.
- Developed a Flutter-based food delivery application with a clean, mobile-first interface for browsing food items, categories, prices, and descriptions.

Technologies: Flutter, Dart, Firebase, Provider, Material Design

Education

B.Sc. in Software Engineering January 2020 – July 2024
Daffodil International University | Dhaka, Bangladesh

Extracurricular Activities

Executive Member 2023 – 2024
DIUMUN
Participated in Model United Nations activities, strengthening communication, collaboration, critical thinking, and structured problem-solving.

Runner-up 2018
Inter-College Debate Competition
Recognized as runner-up, demonstrating public speaking, analytical thinking, argumentation, and communication skills.

Languages

Bengali: Native
English: Professional Working Proficiency
